

Students have the opportunity to explore and actively learn social studies and science topics

Discovery classrooms are transformed into the topics your students are learning about

Discovery topics alternate on a 6 week schedule

# 2024/2025 Discovery Teachers

2nd - 4th

*"From the very beginning of their education, the student should experience the joys of discovery."*

# The Discovery Experience

In the Radcliffe Creek Discovery Room students experience learning through visual, auditory, kinesthetic, tactile and gustatory activities. Students have the freedom to move around the space creating artwork that helps them understand and lock in new information.

The Discovery Experience is not meant to teach children what to think, but how to think.
